BETWEEN SUCH SERVICE AND TRADITIONAL WIRELINE 911 OR E-911 CALLS.

(A) In particular, please note that Customer will not be able to place traditional wireline 911 or E-911 calls with the Voice Service:

- In the event of a power outage, or backup power failure;
- In the event of a loss of connectivity to the network or failure of network equipment;
- In the event of network congestion or overutilization of the network;
- In the event Customer uses a phone at a location other than the established fixed, primary location as determined by PMT's service records (commonly known as "nomadic" use).

Customer acknowledges that PMT has advised that the Voice Service does not support traditional wireline 911 or E-911 in these instances. Customer agrees to advise all individuals of this limitation who may have occasion to place calls using the Voice Service.

You should also be aware that:

- 911 calls may correctly connect to the 911 call center but not automatically transmit the caller's phone number and/or location information.

(B) PMT offers 911 Services subject to the limitations herein. The 911 Services are the static implementation of PMT's E911 Direct portfolio of services. Customer shall ensure that DID/DOD's are not used in a location different than the primary address as submitted on the Customer Service Order. It is the Customer's responsibility to notify PMT of changes in end user location by submitting a new Customer Service Order to PMT to update service records. If the Customer's registered physical location changes the Customer must contact PMT immediately by calling 1-208-434-1847.

911/E-911 calling is not supported when the Voice Service is utilized at any location other than the user's fixed, primary service location.
