

LEWIS AND CLARK POWERPOINT

Your job today is to create a PowerPoint presentation about Lewis and Clark and the Corps of Discovery. Your PowerPoint presentation **MUST** include the following:

- 3 sentences on each slide (except the first and last slide).
- At least 1 picture on each slide (except the last slide).
- A final slide listing the webpages you visited to find your information.

Your presentation **MUST** include these slides (but you can do more if you would like):

- A title slide.
- A slide about Merriweather Lewis and William Clark (names, pictures, when and where they were born, etc.).
- A slide about the expedition (maps, when did they leave, when did they return, how many miles, etc.).
- A slide about Sacajawea.
- A slide about at least 3 of the animals they discovered with information about them.
- A slide about at least 3 of the plants they discovered with information about them.
- One slide of things that you find interesting about the expedition (cool facts, etc.).
- A final slide that lists the websites you visited. You can copy and paste the website addresses on this page. This page does NOT need a picture.

You may be as creative as you want as long as you remember to include all of the information. Don't settle for "good enough." Make this thing great!
