Schedule B1

This Schedule B1 is part of that Managed Internet Access Agreement (the “**Agreement**”) between Tek-Hut, Inc. (“**Tek-Hut**”) and Kimberly School District (“**End User**”). Capitalized terms not defined herein shall have the meaning given to such terms in the Agreement.

Tek-Hut Managed Firewall Terms and Conditions

These Managed Firewall Terms and Conditions (this “**Firewall Agreement**”) set forth the entire Tek-Hut Managed Firewall Service offering (with the Firewall (as defined below), the “**Firewall Services**”) and govern the provision of Firewall Services to the person or entity which subscribes for the Firewall Services (“**End User**”). Tek-Hut reserves the right to make enhancements to the Firewall Services and shall advise End User of any additional features.

Firewall Services Description

A firewall (“**Firewall**”) is a combination, in whole or in part, of hardware and software which is intended to limit the exposure of a computer or computer network against unauthorized access from outside by providing a single point of entry and a passive defense system at that point of entry by providing controlled access. The Firewall Services are designed to provide network and resources access control and manage the public access points to a computer network. Firewall technology in itself is not foolproof and no firewall technology provides an absolute deterrent or barrier to unauthorized entry.

Tek-Hut’s Firewall Services provide a pre-configured rule set policy that trusts all internal traffic, but blocks all externally initiated traffic. This policy is known as "Trust Inside." In this scenario, it is assumed that the most significant threats will come from outside the End User’s enterprise network, and the emphasis of the policy will be keeping outsiders from getting in. This type of stance is implemented by defining a Firewall rule set that permits all connections which are initiated from the inside of the End User’s network, but blocks connections initiated from the outside of the End User’s network.

Installation, Configuration, Administration and URL Blocking

Before installation, End User must complete and return the configuration form provided to End User by Tek-Hut. Tek-Hut will configure the Firewall in accordance with End User’s configuration submission. End User is responsible for confirming that the Firewall is configured in accordance with End User’s preferences prior to and after activation of the Firewall Services. End User shall not tamper with, modify, make error corrections, or otherwise alter any Firewall hardware or software nor permit any third-parties, other than Tek-Hut, to do the same.

Tek-Hut will configure End User’s Firewall with a default policy for URL blocking which is intended to comply with the Children’s Internet Protection Act (“**CIPA**”). If End User makes, or requests Tek-Hut to make, any changes to the Firewall or the Firewall Services, including but

not limited to the URL blocking policies, End User shall be solely responsible for making sure such changes are CIPA compliant. Tek-Hut shall not be liable for any damages, costs, or fees (including, but not limited to any loss of funding provided to End User) as a result of or associated with any changes made to the Firewall or the Firewall Services by, or at the request of, End User.

After installation and upon request by End User, Tek-Hut will administer the Firewall Services (e.g., add or delete user accounts, modify Firewall rules, update network configuration).

Monitoring

Tek-Hut monitors the CPU utilization of End User's Firewall 24 hours per day, seven days per week.

Reports

End User will be able to generate custom reports from the Firewall.

Configuration Backups

Tek-Hut shall maintain a backup of End User's Firewall configuration.

Option Packages

The following option packages are available for purchase by End User:

1. Full Unified Threat Management. This option package is not e-rate eligible.
 - a. **Unified threat management** (UTM) is a comprehensive firewall that includes network firewalling, network intrusion prevention and gateway antivirus (AV), gateway anti-spam, VPN, load balancing, and data leak prevention.
2. Redundant Failover Firewall. This option package is not e-rate eligible
 - a. This version includes a managed backup firewall for a separate internet connection with fail over between locations.

Service Term Commitment

Each order for Firewall Services term is subject to the associated Managed Internet Access Agreement.

End User Obligations

End User shall comply with all obligations set forth herein and all obligations set forth in any vendor and/or Tek-Hut specific license terms and conditions related to the Firewall and/or the Firewall Services. End User acknowledges its responsibility to comply with the terms and conditions of such license agreements and assumes all liability for compliance with such terms,

including but not limited to: (a) informing all of End User's end-users of the terms of such license agreements; (b) monitoring use of the Firewall to ensure compliance with the terms thereof; and (c) maintaining the distribution and security of any user identification and/or passwords necessary to access any Firewall Services and/or the Firewall. Tek-Hut disclaims all liability to vendors for breaches of such license agreements by End User.

To the extent not covered by any license agreements, End User agrees not to reverse engineer, de-compile, disassemble, translate, modify, alter or change the Firewall Services, the Firewall, or any component of either, or otherwise obtain or attempt to obtain any technology (including encryption technology) or source code for any hardware or software that may be provided with the Firewall Services or Firewall. End User acknowledges that the hardware and software provided under this Firewall Agreement or utilized with the Firewall Services provided under this Firewall Agreement may be subject to third party license terms, and/or U.S. export laws and regulations and that any transfer (whether directly or by products incorporating the technology) must be authorized under those laws and regulations. End User agrees not to copy, sell, assign, transfer, sublicense, export or distribute any hardware, software, documentation or other materials that Tek-Hut may provide related to the Firewall Services. Title to such software, and all related technical know-how and intellectual property rights therein are and shall remain the exclusive property of Tek-Hut and/or its suppliers and vendors. End User shall not take any action to jeopardize, limit or interfere in any manner with Tek-Hut and its suppliers' and vendors' ownership of and rights with respect to any licensed software.

End User acknowledges that it is not relying on any representations or warranties made by a manufacturer except for those warranties expressly made in a software end user license agreement (if applicable to End User). It is End User's obligation to remove the Firewall upon termination or expiration of the Firewall Services and return the Firewall to Tek-Hut in accordance with instructions provided by Tek-Hut.

Export Compliance

End User acknowledges that the export, import, and use of certain hardware, software, and technical data provided hereunder is regulated by the United States and other governments and agrees to comply with all applicable laws and regulations, including the U.S. Export Administration Act, the regulations implemented thereunder by the Department of Commerce, and any other applicable laws or regulations. End User represents and warrants that it is a U.S. citizen or permanent resident, a governmental agency, authority or body of a U.S. state government or political subdivision, or a corporation organized under the laws of one or more of the United States of America, that End User is not procuring the Firewall Services on behalf of a foreign national, and that End User is not subject to a U.S. government order suspending, revoking or denying export privileges.

Support and Maintenance

Tek-Hut Customer Service is available to End User for technical support Monday through Friday from 7:00 a.m. (Mountain Standard Time) to 6:00 p.m. (Mountain Standard Time) (such days and hours referred to herein as “**Normal Business Hours**”). Tek-Hut shall provide End User with an emergency number for after-hours support; however, any after service requests received through after-hours support shall be treated as being received on the next business day.

Tek-Hut assigns priority levels to distinguish and prioritize the severity levels of service requests, as follows:

- | <u>Priority</u> | <u>Definition</u> |
|-----------------|---|
| 1 | Emergency – the Firewall is not operating or is operating in a manner which affects Internet access or has resulted in a disruption in Internet service. |
| 2 | All other service requests, such as when the Firewall is operational but requires administrative work or End User has requested a modification of existing rules or policies. |

Tek-Hut shall provide an initial response to service requests received during Normal Business Hours based upon the priority level assigned in the following manner:

<u>Priority Level</u>	<u>Initial Response Time</u>
1	Thirty (30) minutes
2	Forty Eight Hours

For service requests received outside of Normal Business Hours, Tek Hut shall provide an initial response time based on the table above, as if the service request is received on the next business day following receipt of the request.

For all problems that are not resolved within the intervals allotted for each request type, the chart below identifies the order and intervals for internal management notification.

Severity Level	Team Leader	Manager	Director	Vice President
Priority 1	2 Hours	4 Hours	8 Hours	24 Hours
Priority 2	3 Business Days	5 Business Days	6 Business Days	7 Business Days

Tek-Hut remotely installs firewall patches, bug fixes, and software upgrades when approved for general distribution to End User’s Firewall. In the event of a Firewall failure, Tek-Hut may either dispatch a technician to repair the Firewall at End User’s site or replace the Firewall with one of comparable or better functionality, as follows: (a) if a Firewall failure is discovered during Tek-Hut’s normal business hours, Tek-Hut will make commercially reasonable efforts to ship a replacement Firewall or component thereof to End User by the close of that business day; and (b) if the Firewall failure is discovered outside Tek-Hut’s normal business hours, Tek-Hut will make commercially reasonable efforts to ship a replacement Firewall or component thereof

to End User by the end of the next business day.

Unless expressly authorized to do so by Tek-Hut, End User shall not tamper with the Firewall hardware or software, modify its configuration or try to directly access it in any way. End User agrees not to hack or disrupt the Firewall Services or to make any use of the Firewall Services that is inconsistent with its intended purpose or to attempt to do so.

End User shall be responsible for all costs associated with any of the following:

1. End User damages or breaks the Firewall; or
2. End User takes any action which causes the Firewall to operate incorrectly or requires Tek-Hut to service the Firewall.

Ownership and Risk of Loss

Tek-Hut shall retain title to and/or ownership of the Firewall hardware and software provided to End User. The End User will bear all costs associated with loss of, theft of, casualty to or damage to the Firewall hardware, from the time it is installed until the time (if any) when it is returned to Tek-Hut pursuant to this Firewall Agreement and has been received by Tek-Hut.

Firewall Disclaimer

Tek-Hut's Firewall Services solution is designed to prevent outsiders from gaining access to private corporate information and is intended to provide an effective method of monitoring and limiting access. However, the service is characterized as "best efforts" based on the customer-defined policies. It may not prevent some instances of dedicated attackers from breaking their way in, or an employee from gaining unauthorized access to the Internet or to confidential information stored on End User's network.

End User should ensure that any confidential or valuable corporate data is not accessible via the Internet. Tek-Hut shall not be liable for any losses or damage to End User's business or data that arise as a result of Tek-Hut's Firewall Services not preventing unauthorized access. The Tek-Hut Firewall Services are intended to provide a high standard of protection and service; however, no system can claim to be completely secured.
